DOMENICO DE FAZIO

SCIENTIFIC PROGRAM

THURSDAY, JUNE 5, 2025

09:00

Course presentation - L. Cravero, D. De Fazio

09:15

Cadaver lab activity:

- Gliding brow lift/temporal lift/mid face-temporal lift
- Smas lifting with minimal dissection
- High Smas lift/Deep plane lift
- Regular Thread Lifting with silicone threads
- Mid face lift with threads

13:00

Light lunch

14:00

Cadaver lab activity:

- HDS Thread lifting (High Definition Smas thread lifting)
- Fat transfer in face adipose compartments
- Neck lift and jawline with threads
- Eyebrow Lift with threads
- Nose lift with threads
- Upper blepharoplasty, transconjunctival lower blepharoplasty

18:00

Course clousure

We are pleased to announce the first theoretical and practical course on face and neck lifting with permanent threads on cadavers, which will take place at ICLO Teaching and Research Center San Marino on June 5, 2025.

The course aims to provide an in-depth theoretical and practical understanding of facial rejuvenation techniques, from invasive to restorative approaches. Special focus will be given to the latest lifting techniques using permanent silicone threads, combined with fat transfer in adipose compartments.

This course represents a unique opportunity to learn and test the effectiveness of new face and neck rejuvenation techniques on fresh cadaveric specimens, improve surgical skills, and interact with experts who will guide participants through an intensive hands-on surgical training.

Each anatomical specimen will be shared by two participants.

REGISTRATION

REGISTRATION FEE: €1.300

Registration fee includes:

- Participation in the scientific session
- On-site catering
- Educational materials
- Certificate of attendance
