

Third course

Guided dissection to the antero-lateral skull base
including the orbit

Programm v.1

Day 1

Orbit

Surgical anatomy of the orbit

Imaging work-up

Computer assisted planning and treatment in orbital reconstruction

2 hours

- Cadaver hands-on

2 hours

Day 2

Orbital approaches and pathology

Part 1

Surgical approaches

Approaches to the orbit

How I do it (technical notes) : transconjunctival, subciliary, upper blepharoplasty, coronal, Lynch, endoscopic approach

2 hours

- Cadaver hands-on

2 hours

Part 2

Pathology

Orbital tumors: different entities and treatment strategies

Traumatic features : Zygomatic-orbital fractures: classification and management
NOE fractures: classification and management

2 hours

- Cadaver hands-on

2 hours

Day 3

Surgical management

Pitfalls in the management

How I do it (technical notes) : Soft-tissues management, complications management, post-traumatic enophthalmos

3 hours

- Cadaver hands-on

3 hours
